

GC Micro

G.C Micro develops such series of vacuum tips, ejecting needles, sponge nozzles, sponge and other metal parts. We support highly custom design for different die size and form factor, metal materials can be HSS, SUP, stainless SUS and WC, etc.

Surface Coating Technology:

Chemical Vapor Deposition (CVD) High vacuum chamber, Uniform coating thickness (typ. 1 um)

- ❖ To prevent die flipped and sticky to the tip
- ❖ To prevent chip dislocation during pick & place process
- ❖ To eliminate imprint on the chip during pick & place process
